Bellevue University and Interface Web School Partner to Meet Increased Demand for Technically Skilled Workforce

BELLEVUE, Neb. – Bellevue University and Interface Web School have announced a partnership that will help local students complete their degrees and address the demand for a technically skilled workforce. The articulation agreement allows Interface students, who have completed specific coding courses, to earn college credit toward their Bellevue University undergraduate degree.

“Bellevue University is pleased to partner with Interface by offering academic credit to graduates of select Interface courses,” said Mary Dobransky, Dean of Bellevue University’s College of Science and Technology. “The web development and specialization courses, offered by Interface, focus on exactly the kind of technical skills in demand today. We encourage all Interface graduates to continue their academic path at Bellevue University.”

Both institutions embrace a common mission to connect students to area businesses and offer instruction from industry experts.

“Interface’s mission is to build people who build the web,” said Shonna Dorsey, co-founder and managing director of Interface Web School. “One of the areas we focus on is collaborating with local organizations to create more value for our students. This partnership with Bellevue University represents great opportunities for our community and beyond.”

“We respect the learning students gain from Interface’s programs and value the skills they bring to our programs,” said Dobransky. “This is a great opportunity for Interface graduates to receive credit for their hard work and apply that credit toward a variety of bachelor’s degrees such as Web Technologies, Computer Information Systems, Software Development and Graphic Design.”
**About Bellevue University**

Founded in 1966, Bellevue University is a private, non-profit, accredited institution with nearly 50,000 alumni. The University is a recognized national leader in providing post-secondary education opportunities for working adults. Routinely ranked among the nation’s top military-friendly and open access institutions, the University serves students at its main campus in Bellevue, Nebraska; other locations across four states; and worldwide through its award-winning online learning platform. Athletic programs compete in the North Star Athletic Association (an NAIA conference) and have earned the NAIA’s *Champions of Character* distinction. The University is accredited by The Higher Learning Commission through the U.S. Department of Education. For more information, visit [www.bellevue.edu](http://www.bellevue.edu).

**About Interface Web School**

Interface Web School is an Omaha-based web developer training school with the goal of building and retaining tech talent in the Midwest. Interface offers a variety of classes where students prepare to begin careers in web development. Interface strives to increase students’ knowledge and skills for web development and increase the supply of technology talent for startups, small businesses, and corporations. Interface provides practical training to meet the demands of job seekers and employers in today’s job market. The school offers an immersive learning program lead by industry experts and a professional network that connects students and businesses.
